

Total level of CD4 T cells in blood of healthy subject is about 750 cell/uL [PMID: 24496456, 15242966].

Total CD4 T cells in blood: $750 \text{ cell/uL} = 750000 \text{ kcell/L}$.

The percent of Th2 cells (IL-4+/CD4+) is about 2% out of total CD4 T cells in blood [PMID: 26174551].

Th2 cells in blood: $750000 * 0.02 = 15000 \text{ kcell/L}$.
